# Chapter 1

# Upgrading

In this guide:

- Prerequisites and support information
- How to upgrade to the latest version of SmoothTraffic

## Prerequisites

To upgrade to the latest version of SmoothTraffic, you need:

- All the latest updates downloaded and installed on your Smoothwall System. See your *Smoothwall System Administrator's Guide* for more information.

## Getting Help

If you have a current support contract, contact the Smoothwall support department. Our support engineers will be happy to help. For more information, visit <http://www.smoothwall.net/support/>

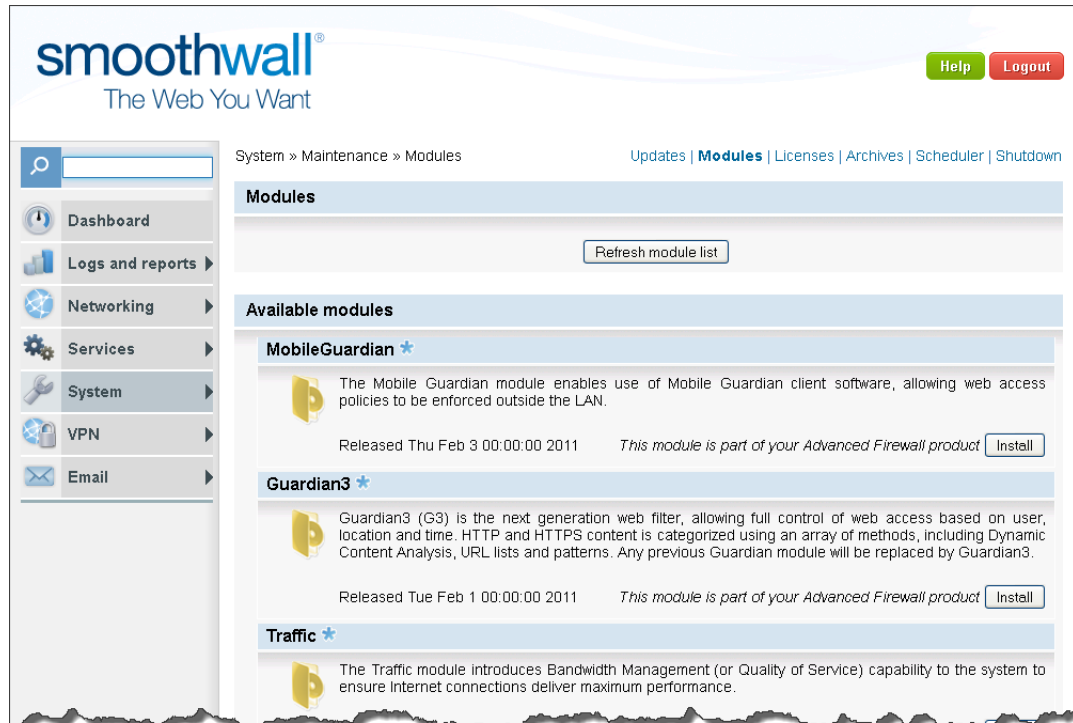

If you require a support contract, contact your Smoothwall representative or visit <http://www.smoothwall.net/> for more information.

# Upgrading SmoothTraffic

The following section explains how to upgrade to the latest version of SmoothTraffic.

## To upgrade to the latest version:

- 1 Log on to your Smoothwall System, browse to the **System > Maintenance > Modules** page and Click **Refresh module list**..

- 2 In the Available modules area, locate SmoothTraffic and click **Install**. Your Smoothwall System installs the latest version. The next step is to reboot your Smoothwall System.
- 3 Browse to the **System > Maintenance > Shutdown** page, select **Immediately** and click **Reboot**. Once your Smoothwall System has rebooted and you have logged on, you can review your SmoothTraffic settings. For more information, see your *SmoothTraffic Administrator's Guide*.
